

**Mayor Antonio Villaraigosa
And
Council Member Tony Cardenas
Invite You to Attend**

LA WiFi Initiative

Town Hall Meetings

HOSTED BY CITY OF LOS ANGELES

Wireless technology is increasingly being used by cities across the nation in innovative and creative ways for such things as improving citizen access to government services, helping cities operate more efficiently, creating a stronger sense of community, and providing more options for wireless access to the Internet.

In recognizing the potential benefits of advanced wireless networks for Los Angeles, Mayor Antonio Villaraigosa and Council Member Tony Cardenas introduced the LA WiFi Initiative with a goal of connecting Los Angeles residents, businesses and visitors to the global community. The City is currently conducting a feasibility study to explore the needs, interests and viability of developing a wireless network throughout the City. As part of the study, City staff would like to meet and hear from the residents in order to gauge levels of community interest from Los Angeles residents and businesses.

Don't miss the opportunity to participate in these Town Hall meetings and provide your input to City staff:
